

THE LIVINGSTON LOFT

Ceilings that soar in rooms filled with natural light highlight the design of the Livingston Loft.

All rooms flow from the foyer where the dining area connects with the living room with its center-placed fireplace flanked by windows and optional skylights. The adjoining nook features a studio ceiling and is separated from the kitchen by an angled peninsula. The cathedral ceiling, private bath, walk-in closet and optional bay window are special touches in the master suite. The library includes a cathedral ceiling and a bay window in the right hand units. This flexible space may also be utilized as a third bedroom, if you prefer. The loft includes an additional bedroom, full bath and more storage.
